

CORPORATE OFFERINGS

Quality. Information Security. Learning & Development. Environment. Health and Safety. Corporate Governance. Social Compliance. Corporate Social Responsibility. The list is ever expanding. The corporate world is no longer what it used to be a few years back.

It is no longer sufficient to know the basics of business – the conversion of raw material into finished goods or service. Today no business runs in isolation. There are several external factors which need to be understood and dealt with in order to survive and grow. There is regulatory framework, international business environment, people issues, process challenges and technological advancements. There are environmental concerns, information security issues, corporate social responsibility etc. Then there are multiple stakeholders who also demand from and influence the business. There are customers, competitors, regulatory bodies, society, end- users etc.

In today's global, interconnected economy, some of the most important issues which concern every business are Quality of products and services, Information Security (confidentiality, integrity and availability of data/information), Education sector, Environmental impact of business, compliance with social laws and entrepreneurship challenges etc.

CampCorp™ provides comprehensive **management and process consulting, learning, audit and implementation facilitation** to its customers across domains. Its focus areas include Higher Education, Software, Information Security, Quality, Environment, HR, Management, Occupational Health & Safety, Social Compliance etc.
