

CORPORATE OFFERINGS

Quality is common sense. However, common sense is the most uncommon thing in this world. When making any buying decision, whether it pertains to product or service, Quality is the first parameter that comes to mind. Today Quality does not mean just meeting requirements, but exceeding them. In fact, Quality has gone from Product to Process to Service to the whole Experience a customer has with an organization.

Quality is a journey. Like sea waves coming one after the other, quality also requires regular reinforcement. A successful Quality / Process Improvement initiative requires top management commitment, detailed planning, customer focus, process approach and continuous improvement. Various models of Quality ranging from ISO 9001, ISO 27001, ISO 14000, MBNQ, EFQM, CMMI etc. have come up to assist organizations in definition and deployment of Quality Management Systems in their organizations. However, implementing Quality is easier said than done. It requires domain knowledge, expertise in process improvement and consulting experience.

With vast experience in the Quality, Security fields in IT and Education domains, **CampCorp™** is the right organization to assist any process improvement or information security deployment effort. CampCorp is a result oriented professional training and consulting group, offering systematic solutions to improve quality and effectiveness of a system that enhance the productivity, efficiency and effectiveness of a system leading to higher profitability and better utilization of organizational resources.

CampCorp™ provides comprehensive **management and process consulting, learning, audit and implementation facilitation** to its customers across domains. Its focus areas include Higher Education, Software, Information Security, Quality, Environment, HR, Management, Occupational Health & Safety, Social Compliance etc.
